The screenshot shows the Micro:bit IDE interface. On the left, a sidebar lists various components, with 'DHT11/DHT22' highlighted. The main workspace displays a 'more' block containing several sensor options. The option 'value of dht11 temperature(°C) at pin P15' is circled in red. To the right, a code block is shown with the following logic:

```
forever loop:  
  show string "Temp:"  
  show number round value of dht11 temperature(°C) at pin P0  
  show string "Humi:"  
  show number round value of dht11 humidity(0-100) at pin P0
```
